

# RFID - Radio-frequency identification

## RETAIL

### BENEFITS RFID

- Work efficiency
- Sales improvement
- Job satisfaction
- Customer service levels increase

### IMPORTANCE RFID

- Detects multiple tags
- read remotely
- limits barcode scanning

### WHY RFID

- Internal control
- Theft Prevention
- Enhanced Security

## PREVENT BEFORE YOU LOSE.....

In this wide of retail market, the theft of products leads to profit shrinkage. RFID **Loss prevention** is specifically designed to reduce preventable losses, reduction in inventory due to shoplifting, theft, or other errors and increase profit for retailers.

### Loss prevention

## UNLOCK RETAIL FUTURE with INTELLIGENCE.....

**Inventory intelligence** helps the retailers to achieve increased visibility in their products from origin to billing. The inventory intelligence at greenfutz help retailers to reduce inventory loss and give full range support in loss prevention. The inventory intelligence also helps to improve inventory accuracy, reduce markdowns, and drive efficiency in business and revenue.

### Inventory intelligence

**RETAIL SOLUTIONS**  
**RFID**

## BILL your BILL.....

The **Automated billing system** using RFID technology for product identification and billing will prove extremely useful, efficient and functional in high intensity retail markets, which also ensures Anti-theft security as an added bonus.
